

EBS[®]
Ink-Jet Systeme

Continuous Ink-Jet Printer

EBS[®] 6200 • EBS[®] 6200 Micro
EBS[®] 6200P • EBS[®] 6200P Micro

The EBS 6200 Series

Protection class IP53 / IP54

The continuous ink-jet printer series EBS 6200 / Micro for non-pigmented and EBS 6200P / Micro for pigmented inks provide a user friendly, reliable and above all, efficient solution for your marking requirements.

All-round talent

„Micro“ stands for a special model with a very fine 50 µm ruby nozzle. With the „Micro“ series, marking with a print height of 0,8-10 mm is not a problem. The allround printer EBS 6200 / EBS 6200P with 60 µm nozzle has a print height of 1,5-14 mm.

Total flexibility

Each model of EBS 6200 series can be upgraded at any time, even if you start with the basic model EBS 6200 mini and later on decide to print 3 or 4 lines instead of only 2.

It is quite simple and economical to get software updates or release codes. Today, you only buy what you really need at the best price. This gives you the optimum planning reliability for the future.

High operating reliability

The series EBS 6200 has been designed to run 24 hours a day, 7 days a week, without any interruption. The use of extremely durable components makes the machine consistently reliable. With your personal contribution the maintenance time and costs can be minimized. With every printer we can offer a short introduction and technical training to make sure that the user will achieve the best results. Reliable! Easy-to-use! Low-maintenance!

EBS 6200: PET bottle printing

Simple concept - The models

	EBS 6200	EBS 6200P

90° print head	○	○

EBS 6200 Micro - 7x5 matrix on metal < 1mm

Simple. Cheap. Printing.

Extremely efficient

- Lowest power consumption (< 30W).
- Lowest solvent consumption right from the first shift.
- Very little waste of consumables during service.
- Long service intervals (2,000 – 3,000 operating hours).
- Without external compressed air!
- Printing on metal, plastic, glas, ceramic, cardboard, etc.
- Basic service can be made by the operating staff themselves (every 500 - 800 hours).
- Large selection of inks: special inks for UV applications, security inks, food grade inks, inks for coated glass, etc.
- NO need to exchange expensive components in fixed intervals. Only you decide when a comprehensive service fits into the schedule.
- Small dimensions, easy to handle and install.

Technically mature

The EBS 6200 series is based on the experience made with the EBS 6100 series and EBS 6000 series, which have been successfully established in the market for 12 years. The high market acceptance can be proven by more than 15,000 EBS CIJ machines installed so far. Out of the continuous development of the EBS 6100 series, now evolves the latest generation; the EBS 6200.

Wherever an EBS printer will be installed - it will stay there!
Durable, reliable, cost-effective even years later.

EBS group of companies

EBS (formerly BDT Cologne), has been in the contact-free coding business since 1977. Our early pioneering techniques have been copied countless times and are still used successfully throughout the world today.

At present the EBS group consists of three independent main companies (located at Nümbrecht near Cologne, Germany, Libertyville, IL, USA and Wroclaw in Poland), several connected sub-companies and dozens of cooperation partners, with more than 150 employees.

The sales network of our industrial printing systems, which are developed and manufactured by ourselves, is organized in over 60 countries by more than 120 distributors, dealers and OEM's.

Our common goals are:

- outstanding quality
- fair pricing
- very good service
- durable products
- satisfied customers

In 2005 our manufacturing plant in Poland gained the ISO 9001:2000 certification emphasizing our constant effort for quality improvement.

- 30 years of ink-jet expertise -

We would be pleased to welcome you as our new customer!
